

## Covid-19/PUI Communication Diagram

### Vital Signs:

- 1) Temp > 102.5
- 2) HR < 50 or HR > 110
- 3) RR < 6 or RR > 22
- 4) SPO<sub>2</sub> < 92% Or Any up titration in oxygen.
- 5) SBP < 100 or SBP > 180 or DBP > 100.
- 6) Pain > 7, not controlled by PRN
- 7) fingerstick BG < 65 or BG > 400

### Call for complaints:

- 1) chest pain
- 2) worsening shortness of breath/wheezing
- 3) altered mental status (includes somnolence and delirium)
- 4) vomiting
- 5) concerns that patient unable to swallow
- 6) Fall without loss of consciousness. Even if patient has head trauma, if they are conscious call 7H attg via Vocera

**\*If patient is requiring 6L NC and still hypoxic, place HiOx mask @8L and call 7H Attg**

### Other Airway Activation Criteria:

#### Refractory hypoxemia

- ≥6L of O<sub>2</sub> applied
- When spo<sub>2</sub> is <92% with ≥6L O<sub>2</sub>
- When HIOX with HEPA filter is applied

#### Respiratory distress

- overt respiratory distress (use of accessory muscles)
  - RR > 25
- ABG pH < 7.32 OR > 7.48
- PaCO<sub>2</sub> 20 or more points above baseline on ABG

Respiratory Arrest

Cardiac Arrest

Acute Loss of Consciousness

Call 7H Attg: 7H pager 21502 or Vocera "7H attending"

If unable to reach, call ICU consult #15266 or Vocera "Triage NP".

If no response, call 65500 for Code 95.
